

## DIABETICS

We must have a School Diabetic Care Plan on file from your physician, even if you have an insulin pump or only check levels but not taking insulin. We need orders in case of emergencies and so we are able to assist and care for all diabetic students. We need emergency medications and orders in the nurse's office.

**\*\* EPI-PENS and RESPIRATORY RESCUE INHALERS ONLY\*\***

If a student is permitted by parent/guardian and the LHP to self-carry or self-administer medication (applies only to inhalers or epi-pens), this should be indicated by the LHP on the Medication Administration form. You **MUST** have a 2nd epi-pen in the nurse's office. We recommend a 2nd inhaler to be left in the nurse's office also to serve as a "back-up" in case your student forgets to bring it or loses their medication.
